The special feature of the MESH seat is the intelligent 3D frameless backrest that allows you to stretch and move freely and find a healthy balance between support and freedom of movement. The elastic threads of the suspension backrest are of variable thickness and tension to provide greater support in the transition areas along the spine and less support at the other points, to facilitate a wide range of movements while seated.

Warranty:

12 years from the date of production on any part of the chair, on any manufacturing defect.
